AIMS

Advancing Innovative Manufacturing
in the south of Scotland

EUROPE & SCOTLAND
European Regional Development Fund
Investing In a Smart, Sustainable and Inclusive Future

The Advancing Innovative
Manufacturing in the south
of Scotland (AIMS) project is part
funded by the 2014-2020 European
Structural and Investment Fund

Here's how the AIMS Project has helped one SME with the Lorch Welder system...

“AIMS designed and manufactured a fixture plate which will allow the set up and automated welding of a part, using the jig allows for the part to be welded without the distortion issues which were previously experienced. The automated welding process will allow skilled welders to be freed up helping bridge the skills gap, and provide consistent quality of product along with a consistent production time. With the support provided via AIMS we are now able to produce a higher quality product for our customer with a faster more reliable process.”
